PROFILE

Full-stack and desktop application developer from Baler, Aurora, completing a BS in Information Technology at Aurora State College of Technology. Builds offline-first desktop systems with Electron, Node.js and SQLite, and responsive web applications with PHP, MySQL, HTML, CSS and JavaScript. Has delivered a medical records system for a rural health facility and a business website for a local establishment.

EXPERIENCE

Full-Stack & Application Developer — Sep 2026

Bella's Takoyaki / Baler, Aurora / Freelance / Project-Based

- Designed, developed and deployed a responsive frontend business website for a local establishment in Baler, Aurora.
- Engineered interactive user interface features using HTML, CSS, JavaScript and Bootstrap to improve brand visibility and customer engagement.

HTML | CSS | JAVASCRIPT | BOOTSTRAP

MedSys: Integrated Medical Records & Patient Management System — Jul – Sep 2026

Dr. Andres Aragon Angara Health Center & Birthing Facility / Capstone Project

- Developed a desktop and web-based system using HTML, SQLite and Electron to manage patient check-ins and medical histories.
- Created a digital record module to replace paper-based forms for maternal and birthing patient data.

ELECTRON | SQLITE | HTML

PROJECTS

Desktop Software Development Projects

- Built self-contained, cross-platform desktop applications with Electron.js and Node.js for offline database interactions and administrative workflow automation.

ELECTRON.JS | NODE.JS
